Best use of Wine Storage in a unique location: Michael David Bright

Bright Woodworks, Inc. St. Petersburg, FL

"The overall house design makes this room a feature because of its inside/outside orientation. The homeowners wanted the casual look of furniture rather than cabinets. The Sub-Zero appliances allowed for the true integrated look. The wine storage unit was recessed into a wall with only a 6" projection, giving a very unique look and feel. The ice maker false front was divided into a drawer face and door to match the adjacent cabinet faces, giving the illusion of a piece of antique furniture. Functionally and esthetically the space works great."
